

Inflight Checks:

These are done after formation is saddled.

- 1. Set EMCON switch to ON.**
- 2. Set master arm switch to SAFE.**
- 3. Call up the SMS page on the left MDI, verify correct load-out.**
- 4. Set weapon targets and weapon deployment parameters.**
- 5. Call up the Radar (RDR) page on the right MDI.**
- 6. Check Radar is in RWS (Range while Search) mode.**
- 7. Set A/A Radar to 40nm range (or as ordered by flight lead)**
- 8. Select CSEL for return LANDING RUNWAY HEADING**
- 9. Set ALOW per mission brief.**
- 10. Select your droptanks at the appropriate station selection pushbuttons, but DO NOT arm the external stores jettison knob.**
- 11. Verify fuel load.**
